EUROPEAN UNION REFERENCE LABORATORY

PESTICIDE RESIDUES IN
CEREALS & FEEDING STUFF

29 October 2017

EUPT-CF12 - Announcement

The European Union Reference Laboratory for Pesticides Residues in Cereals and Feedingstuff (EURL-CF) announces its twelfth European Proficiency Test on for pesticides in cereals/feeds requiring multi residue methods (MRMs), EUPT-CF12.

The aim of the test is to provide laboratories with an assessment of their analytical performance and the reliability of their data - in comparison to other laboratories. This will hopefully result in positive changes and quality improvements at each of the laboratories.

Test Items

The Test Material will be **hay flour with incurred pesticides**. The participants will receive approximately 20 g of a treated and approximately 50 g of a blank test material.

Activity	Dates
Announcement Calendar Target Pesticide List	November 2017
EUPT-Registration Website open	5 December 2017
Deadline for registration	12 January 2018
Specific Protocol published	15 January 2018
Website for selecting pesticide scope open	15 January 2018
Website for selecting pesticide scope closed	26 January 2018
Distribution of Test items	29 January 2018
Deadline for receipt and acceptance of Test Materials	within 24 hr on receipt
Deadline for Result Submission	1 March 2018 at 24.00 CET
Deadline for submission of additional method information for false negative results	5 March 2018 at 24.00 CET
Preliminary Report (only compilation of results) published	30 April 2018
Final Report published	December 2018

Target list – 2 new pesticides

- Formetanate
- Prosulfocarb

Voluntary pesticides from working document

- Ametoctradin
- Benalaxyl including other mixtures(sum of isomers)
- Benzovindiflupyr
- Chlorfluazuron
- Clomazone
- Cyazofamid
- Cyflufenamid
- Etoxazole
- Fenpyrazamine
- Isopyrazam
- Novaluron
- Penflufen
- Penthioypyrad
- Proquinazid
- Pyridalil
- Pyriofenone
- Spinetoram
- Spirotetramat
- Spirotetramat metabolite BYI08330-enol
- Spirotetramat metabolite BYI08330-ketohydroxy
- Spirotetramat metabolite BYI08330-monohydroxy
- Spirotetramat metabolite BYI08330 enol-glucoside
- Sulfoxaflor

EUPT-CF12 Pesticide Target List

(last updated: 30.11.2017)

Pestide no.	Pesticides	MRRL
Compulsory Compounds (will be considered in Category A/B class)		
1	2-phenylphenol	0.05
2	Acephate	0.05
3	Acetamiprid	0.05
4	Acrinathrin	0.05
5	Aldrin	0.05
6	Azinphos-methyl	0.05
7	Azoxystrobin	0.05
8	Bifenthrin	0.05
9	Biphenyl	0.05
10	Bixafen	0.05
11	Boscalid	0.05
12	Bromuconazole	0.05

Hay from ryegrass

- Ryegrass was grown in Denmark in 2017
- Field treated by Aarhus University, Research Department Flakkebjerg
- Untreated ryegrass was by mistake combined with dirty plots
 - Purchased ryegrass hay from a organic farmer - but also this contained residues – maybe due to contamination from the mill
 - Purchased organic produced hay from a pet store.

RT: 7.59 - 40.33

Pesticides in Test Material

Pesticide	Included in the Target List	Formulation or standard	g.ai/ha
Azoxystrobin	x	Amisiar	250
Boscalid	x	Viverda	350
Epoxiconazole	x	Viverda	125
Fluxapyroxad	x	Imtrex	125
Metrafenon	x	Flexity	150
Pirimicarb	x	Pirimir G	100
Proquinazid	x	Talius	50
Pyraclostrobin	x	Viverda	150
Tau-Fluvalinate	x	Mavrik	48
Chlormequat		Cycocel extra	1518
Chlorotalonil		Bravo	1000
Fluroxypyr		Starane 333 HL	133
Glyphosat		Roundup Bio	1440
MCPA		Metaxon	750
Trinexapac-ethyl		Modus M	200

Spike procedure

- 20 gram Test Item with pesticide residues
- 50 gram Blank Test Item
- Instruction to use only 1 gram sample and 10 ml water.

Sample shipment

- Samples were distributed on Monday 29 January 2018 (17 January to non-European countries)
- Most samples were delivered to EU laboratories within 1 day

Homogeniety test

	Mean, mg/kg	S_s^2	c	$S_s^2 < c$

Calculation of assigned values and uncertainty of assigned values

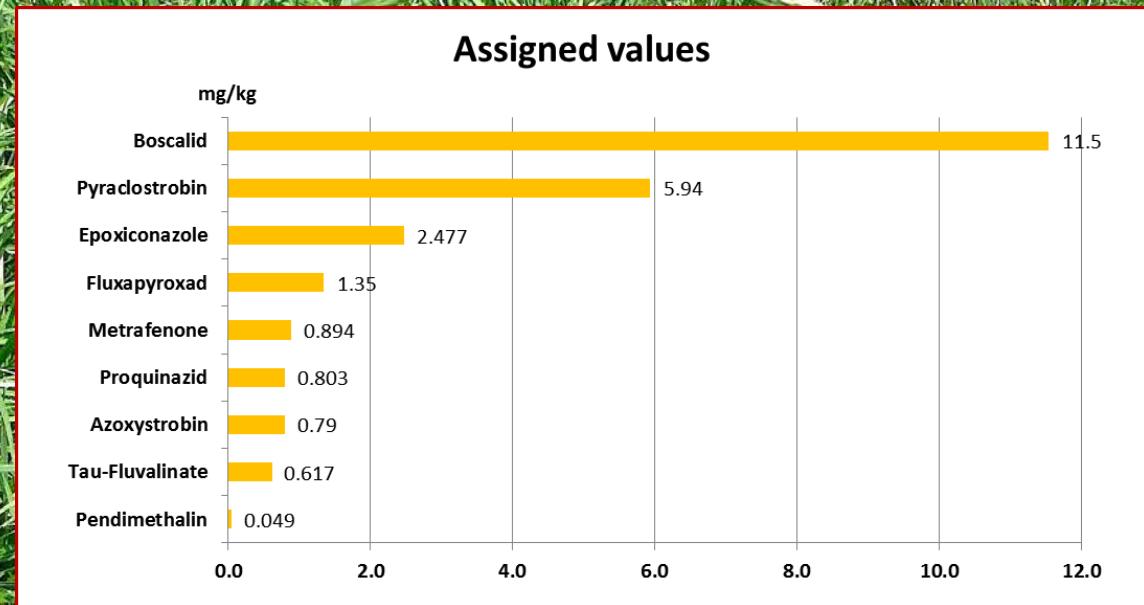

- Algorithm A mean of results from EU and EFTA laboratories
 - Only result from participants that
 - Reported to add water to the samples before extraction or
 - used mixture of solvent and water or
 - used LPE
- Outliers
 - Only obvious uncorrect results
 - *(2 results for azoxystrobin and boscalid - 1000x)*
- Uncertainty
 - $u=1.25 * (s^* / \sqrt{n})$
 - s^* is robust standard deviation (Alg A standard deviation)
 - N is the number of participants

Calculation of assigned values and uncertainty of assigned values

Calculations of z-scores

- For each laboratory/pesticide combination :

$$z = (x - \bar{X}) / \sigma$$

- x is the result reported by the participant or the specific reporting limit of the lab for those labs not having detected the pesticide present in the test material
 - \bar{X} is the assigned value, Alg A mean without outliers
 - σ is the target standard deviation obtained by multiplying the median by the FFP RSD of 25%
-
- $|z| \leq 2$ Acceptable
 - $2 < |z| < 3$ Questionable
 - $|z| \geq 3$ Unacceptable

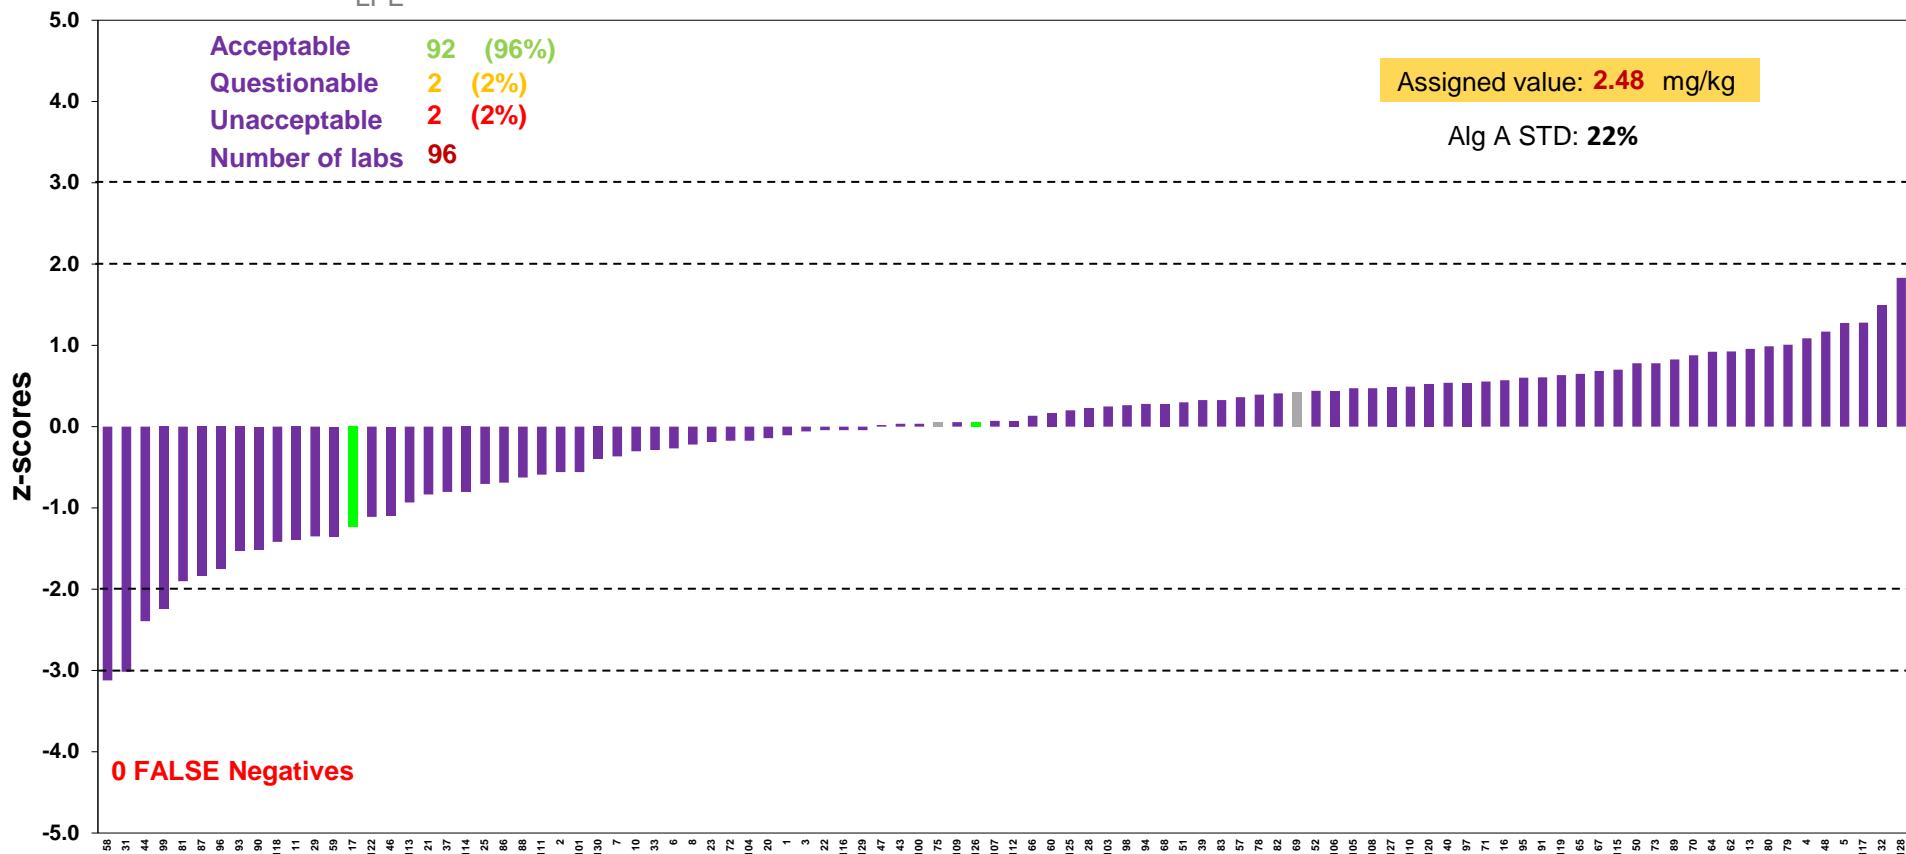

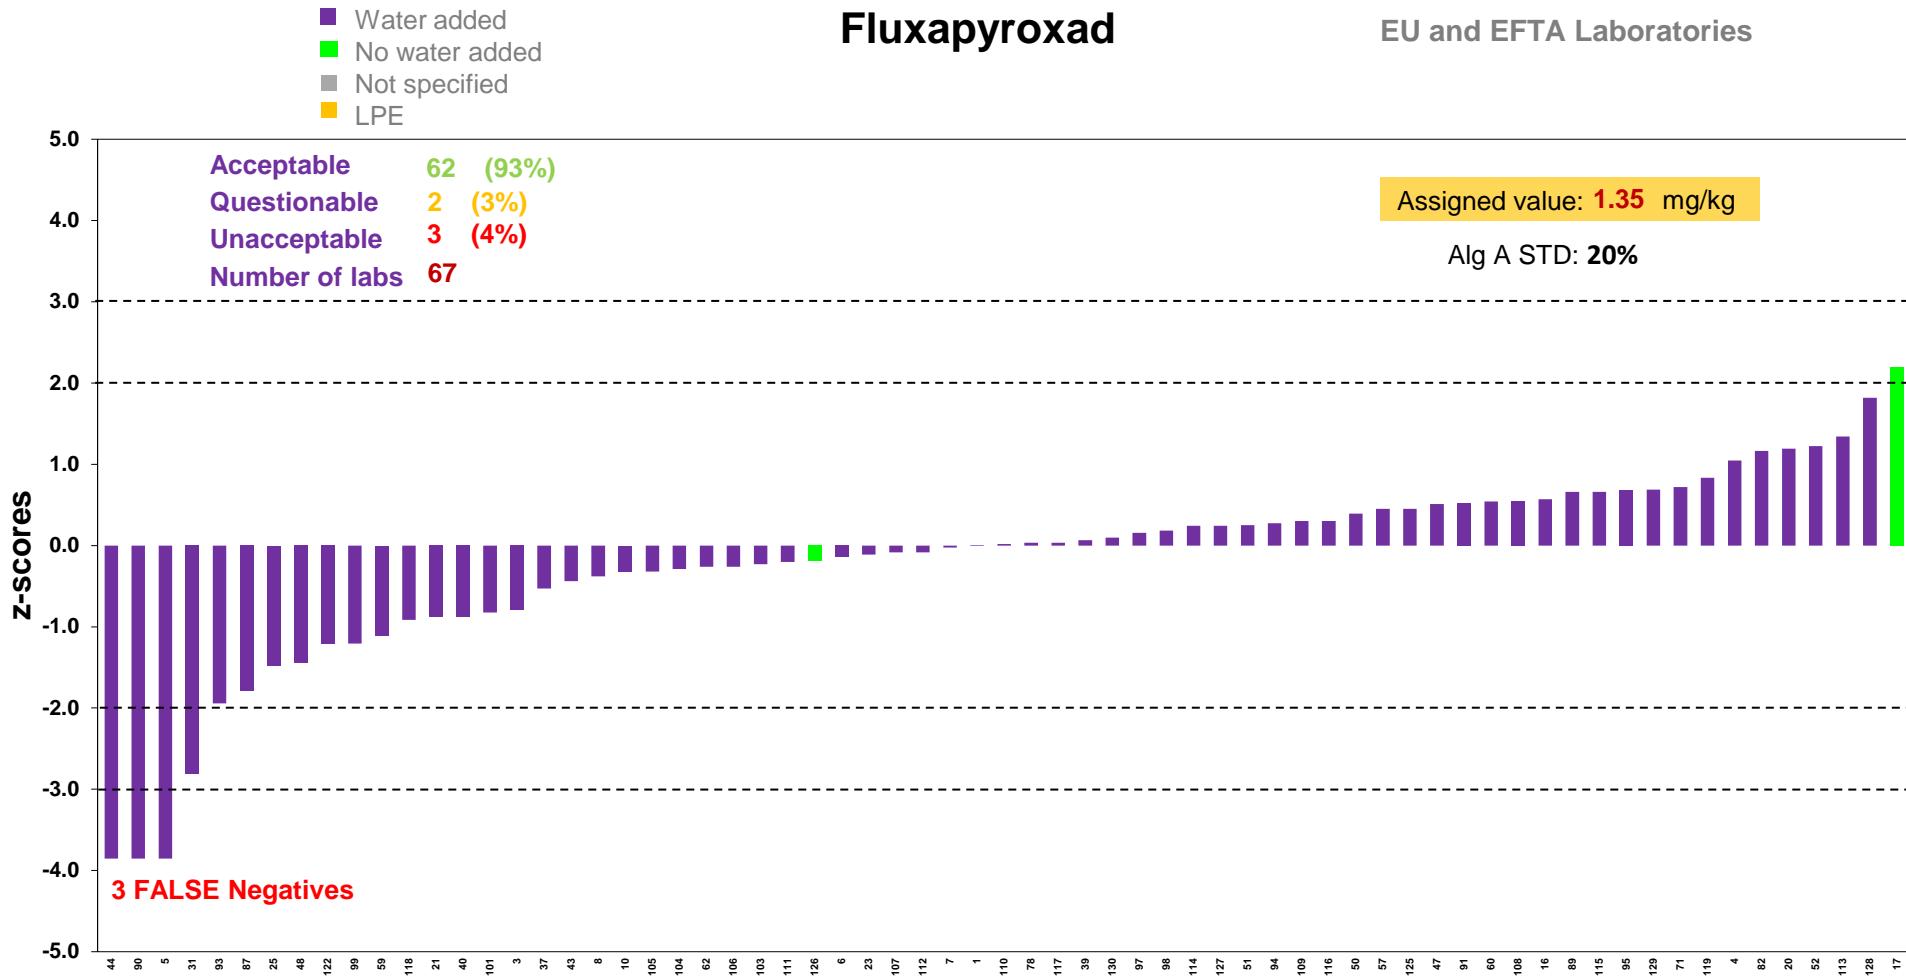

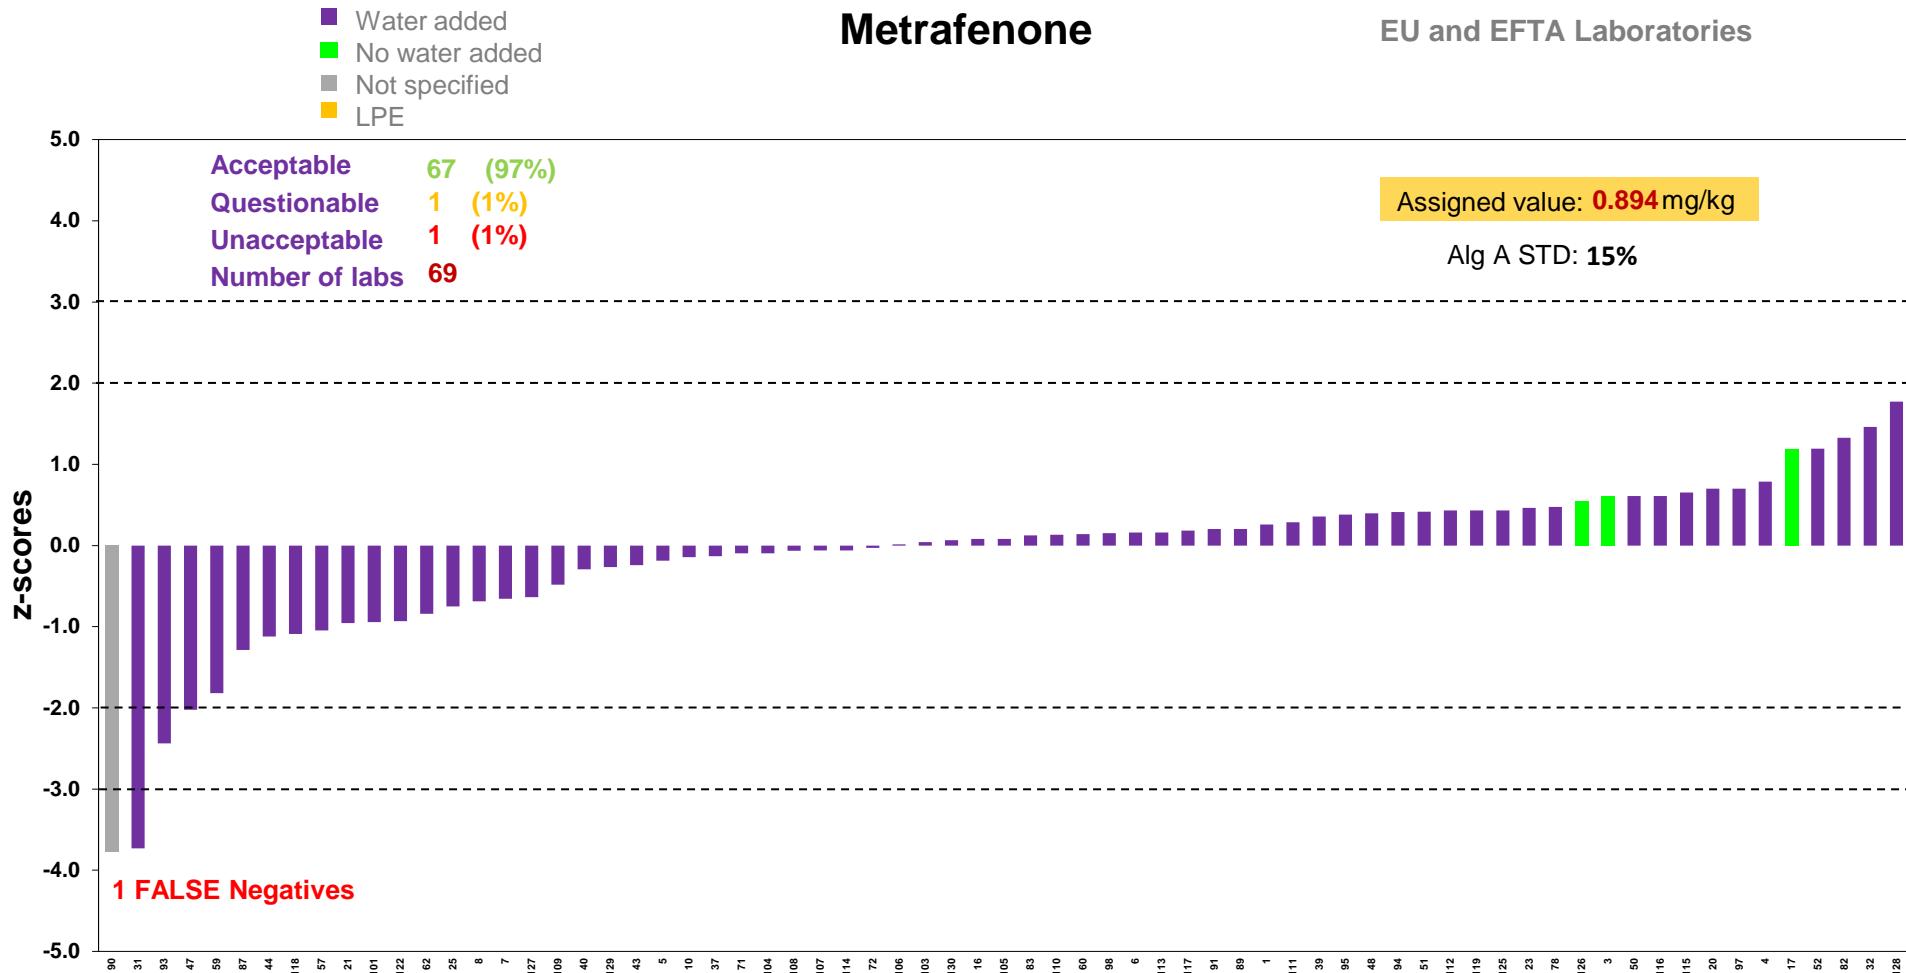

- █ Water added
- █ No water added

Alg. A RSD

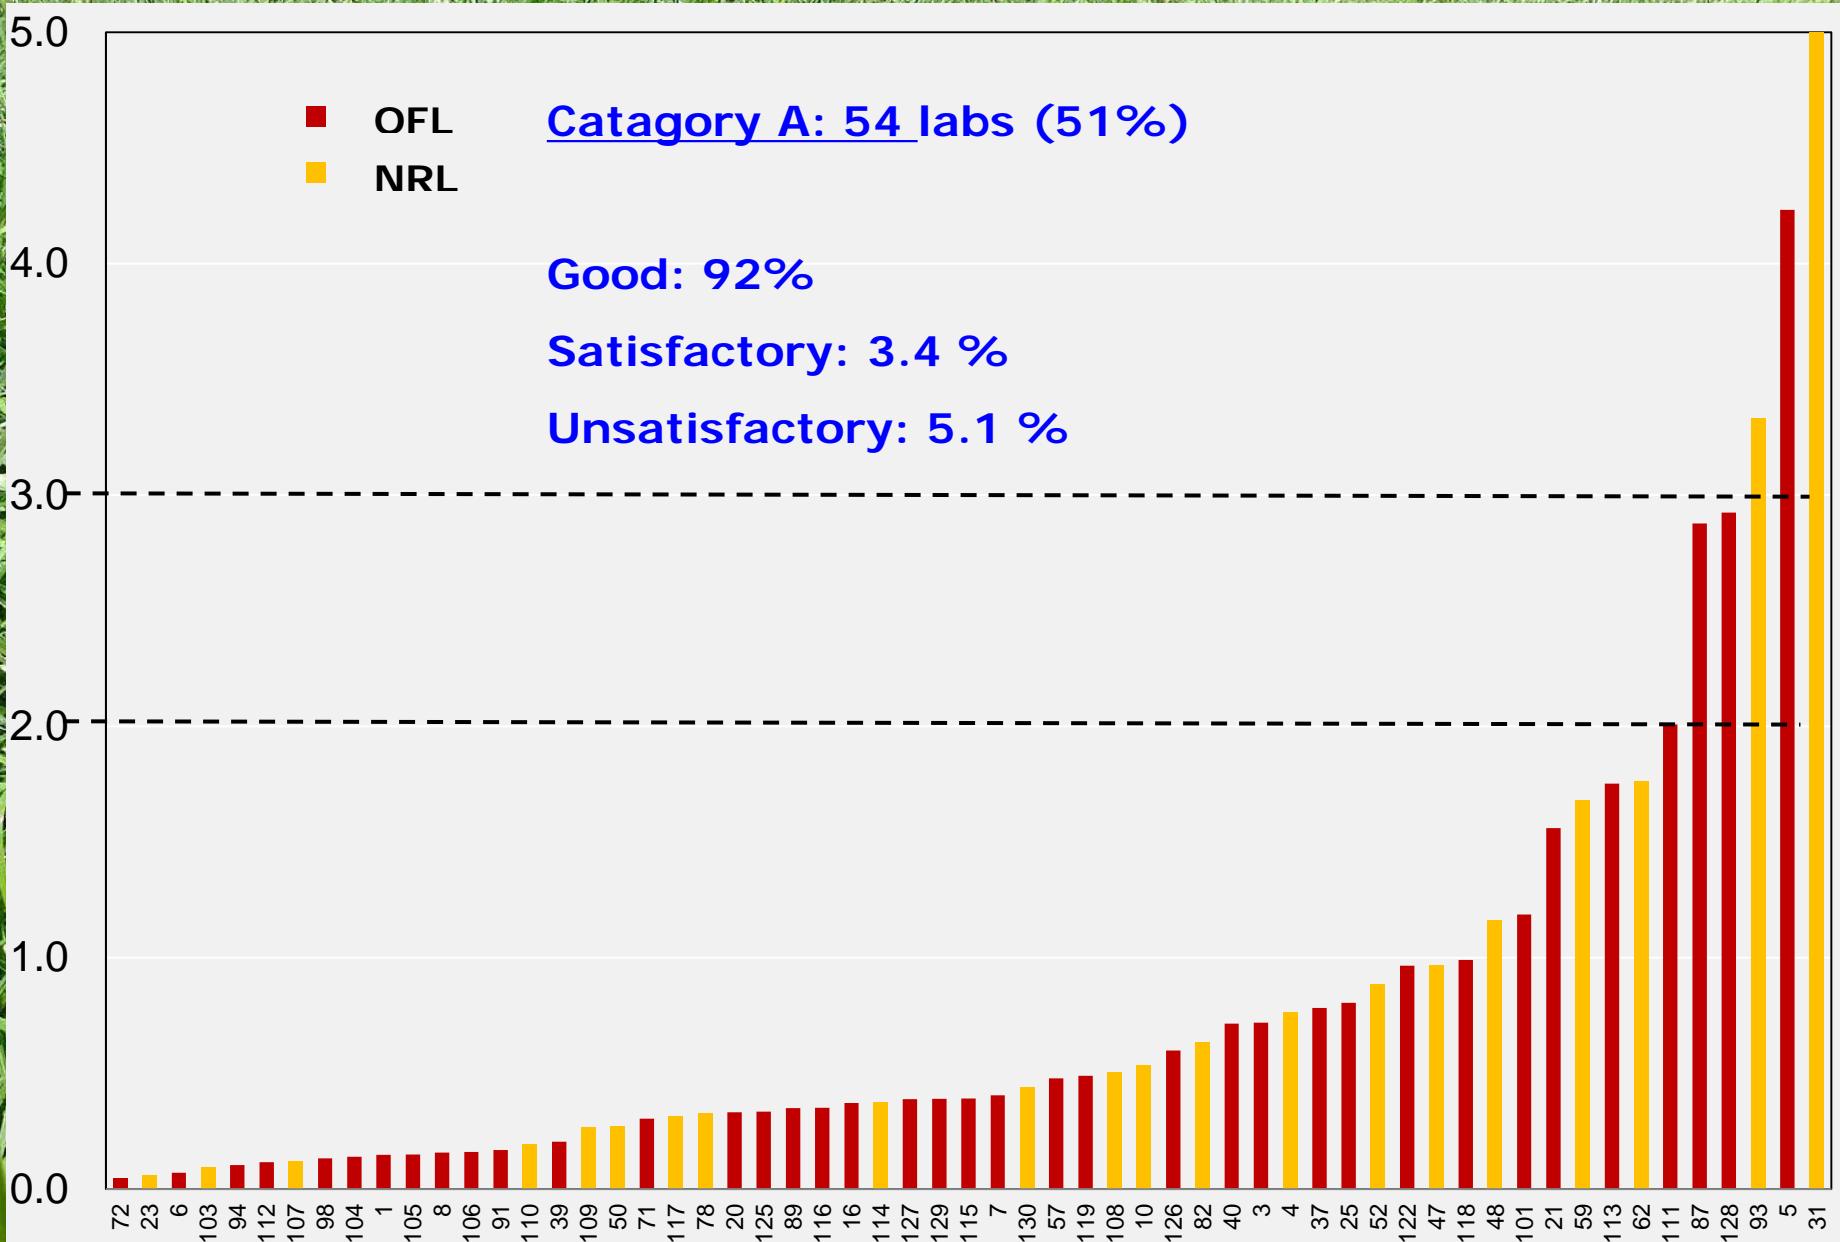

Category A laboratories and combined z-scores

- To be classified as Category A laboratory the labs had to 1) be able to analyse for at least 90% of the compulsory pesticides on the target pesticides list, 2) have correctly detected and quantified at least 90% of the pesticide present in the test material ($7 \geq$ pesticide residues) and 3) report no false positive.
- Evaluation of the overall performance, the Average of the Squared z-Score (AZ²) are calculated:

$$AZ^2 = \frac{\sum_{i=1}^n Z_i^2}{n}$$

- $z \leq 2$ Good
- $2 < z \leq 3$ Satisfactory
- $z > 3$ Unsatisfactory
