

# COOPERATIVE STUDY

## CERTIFIED STANDARD SOLUTIONS

María Murcia Morales

Carmen Ferrer Amate

Ana Lozano Fernández

Amadeo R. Fernández-Alba

**EURL-FV**

# INTRODUCTION AND OBJECTIVES

The use of certified standard solutions leads to savings in time and laboratory work. However, there is not enough evidence of the quality of these solutions.

The present cooperative study is aimed at verifying the comparability of different certified standard solutions.

Seven participants analysed the same solutions and reported their results.

# PARTICIPANT LABORATORIES

NRL. NVWA - Netherlands Food  
and Consumer Product Safety  
Authority

NRL. Laboratorio  
Arbitral Agroalimentario

Eurofins SiCA AgriQ SLU

EURL for Pesticide Residues in Fruits and Vegetables  
University of Almería

NRL. National Food Agency  
(Livsmedelsverket)

NRL. AGES - Austrian Agency for  
Health and Food Safety. Department  
for Pesticide and Food Analysis  
(PLMA)

Laboratorio Agroalimentario de Valencia

# 4 certified standard solutions prepared by external specialised firms

All of them containing 28 LC-amenable pesticides included in the scope of the EU-MACP

2,4-D	Emamectin benzoate
Abamectin	Fenamiphos-sulfoxide
Acephate	Fenthion
Acetamiprid	Fipronil
Ametoctradin	Haloxyfop
Benomyl	Kresoxim methyl
Bromuconazole	Malathion
Bupirimate	Methiocarb sulfone
Carbaryl	Omethoate
Carbendazim	Procymidone
Carbosulfan	Protioconazole-desthio
Cyromazine	Spinosad
Demeton-S-methylsulfoxide	Thiobencarb
Diuron	Triadimefon

**Certified concentration**  
50 mg/L

**LabStandard®**

**SPEX CertiPrep.™**

December 2017 – February 2018

## Preparation of solutions

Diluted to 1 mg/L in acetonitrile

Stored at -20 °C

April 2018

## Shipment of solutions

Diluted to 50 μg/L

Analysed 6 times in pure solvent by liquid chromatography

Concentrations calculated by comparison with their own standards

## SOLUTION D

### Concentrations reported by each laboratory ( $\mu\text{g/L}$ )

### Selection of pesticides for the assessment of solutions

- Inter-laboratory CV ≤ 10%

## 28 PESTICIDES

2,4-D  
Abamectin  
Acephate  
Acetamiprid  
Ametoctradin  
**Benomyl**  
Bromuconazole  
Bupirimate  
Carbaryl  
**Carbendazim**  
Carbosulfan  
Cyromazine  
Demeton-S-methylsulfoxide  
Diuron

- 18 Used for the assessment of solutions
- 8 Individual study
- 2 Not for quantification purposes

**Emamectin benzoate**  
Fenamiphos-sulfoxide  
Fenthion  
Fipronil  
Haloxyfop  
Kresoxim methyl  
Malathion  
**Methiocarb sulfone**  
**Omethoate**  
**Procymidone**  
Protioconazole-desthio  
**Spinosad**  
Thiobencarb  
Triadimefon

# **Benomyl and carbendazim**

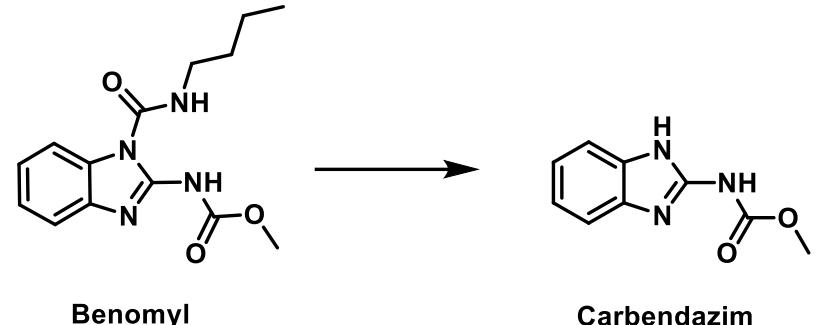

# BENOMYL AND CARBENDAZIM

Benomyl is very unstable and decomposes into carbendazim

Both pesticides were included in the request of solutions A, B, C, D

**Company A**

**In separated vials**

26 + benomyl

**Company B**

“Carbendazim has low solubility in the solvent”

26 + carbendazim

**Company C**

“Benomyl has low solubility in the solvent”

26 + benomyl + carbendazim

**Company D**

**In the same vial**

# Assessment of the concentrations in the solutions

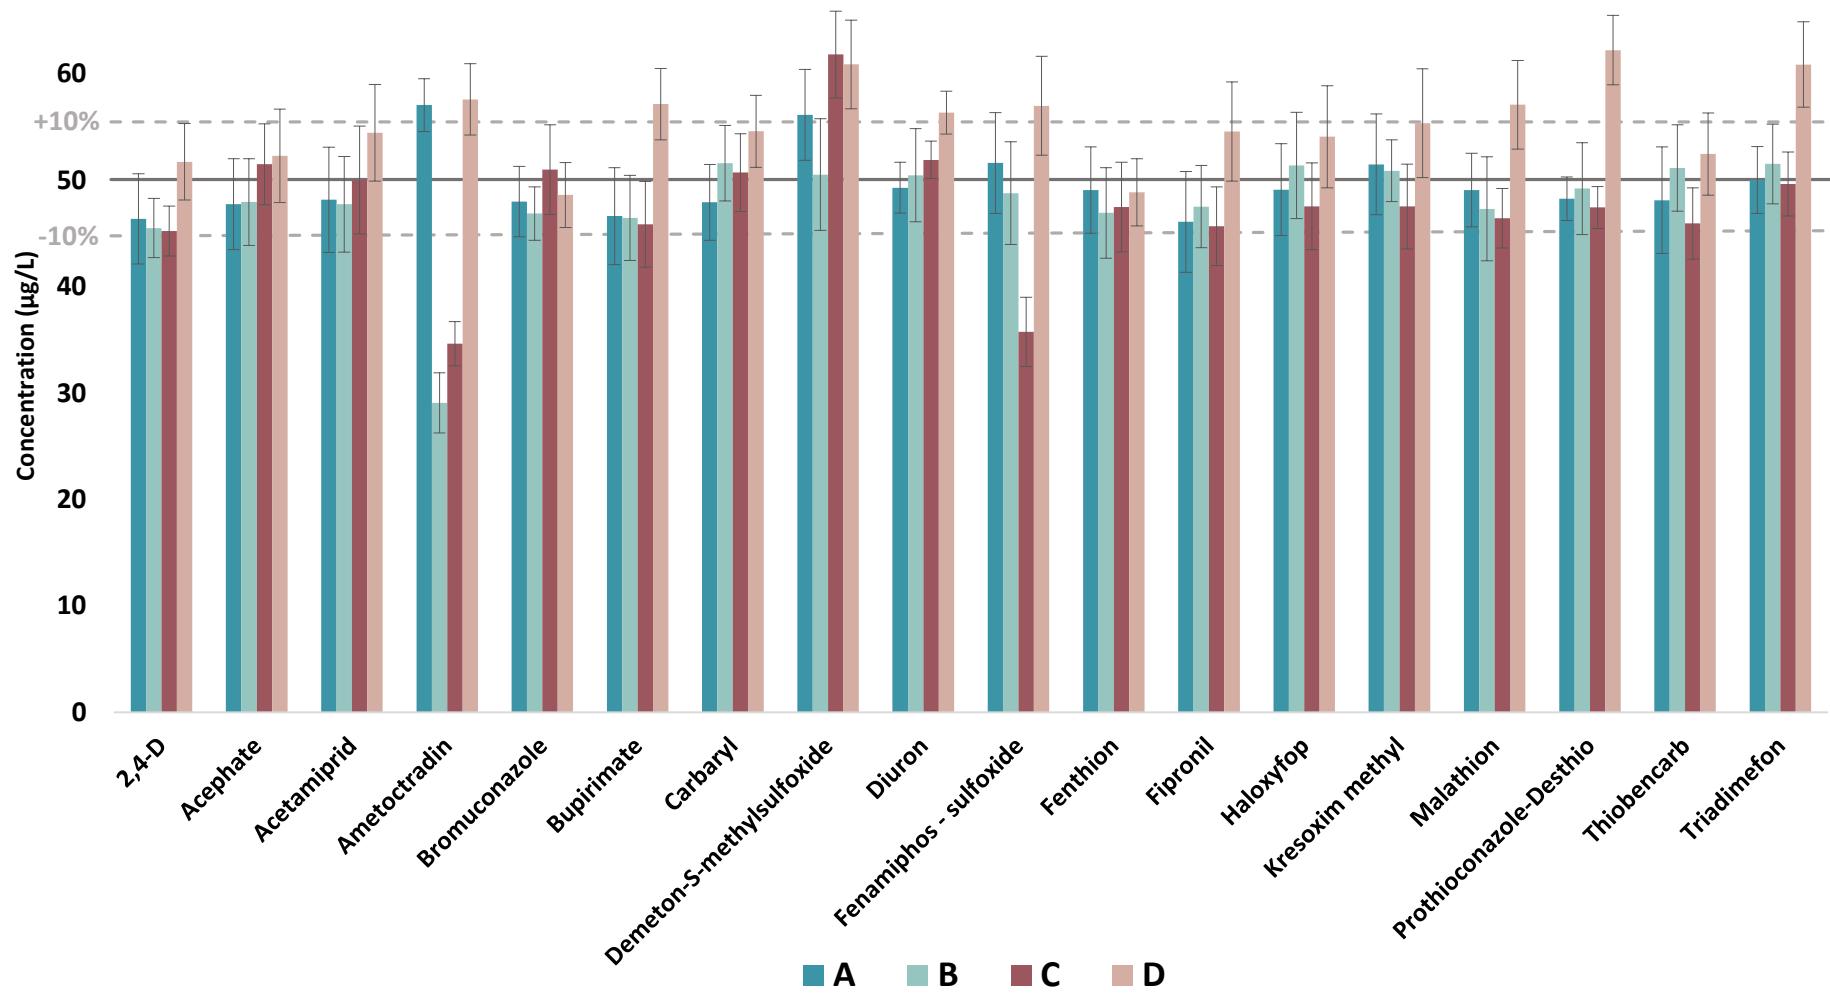

Inter-laboratory CV  $\leq 10\%$  ( $n \geq 5$ )

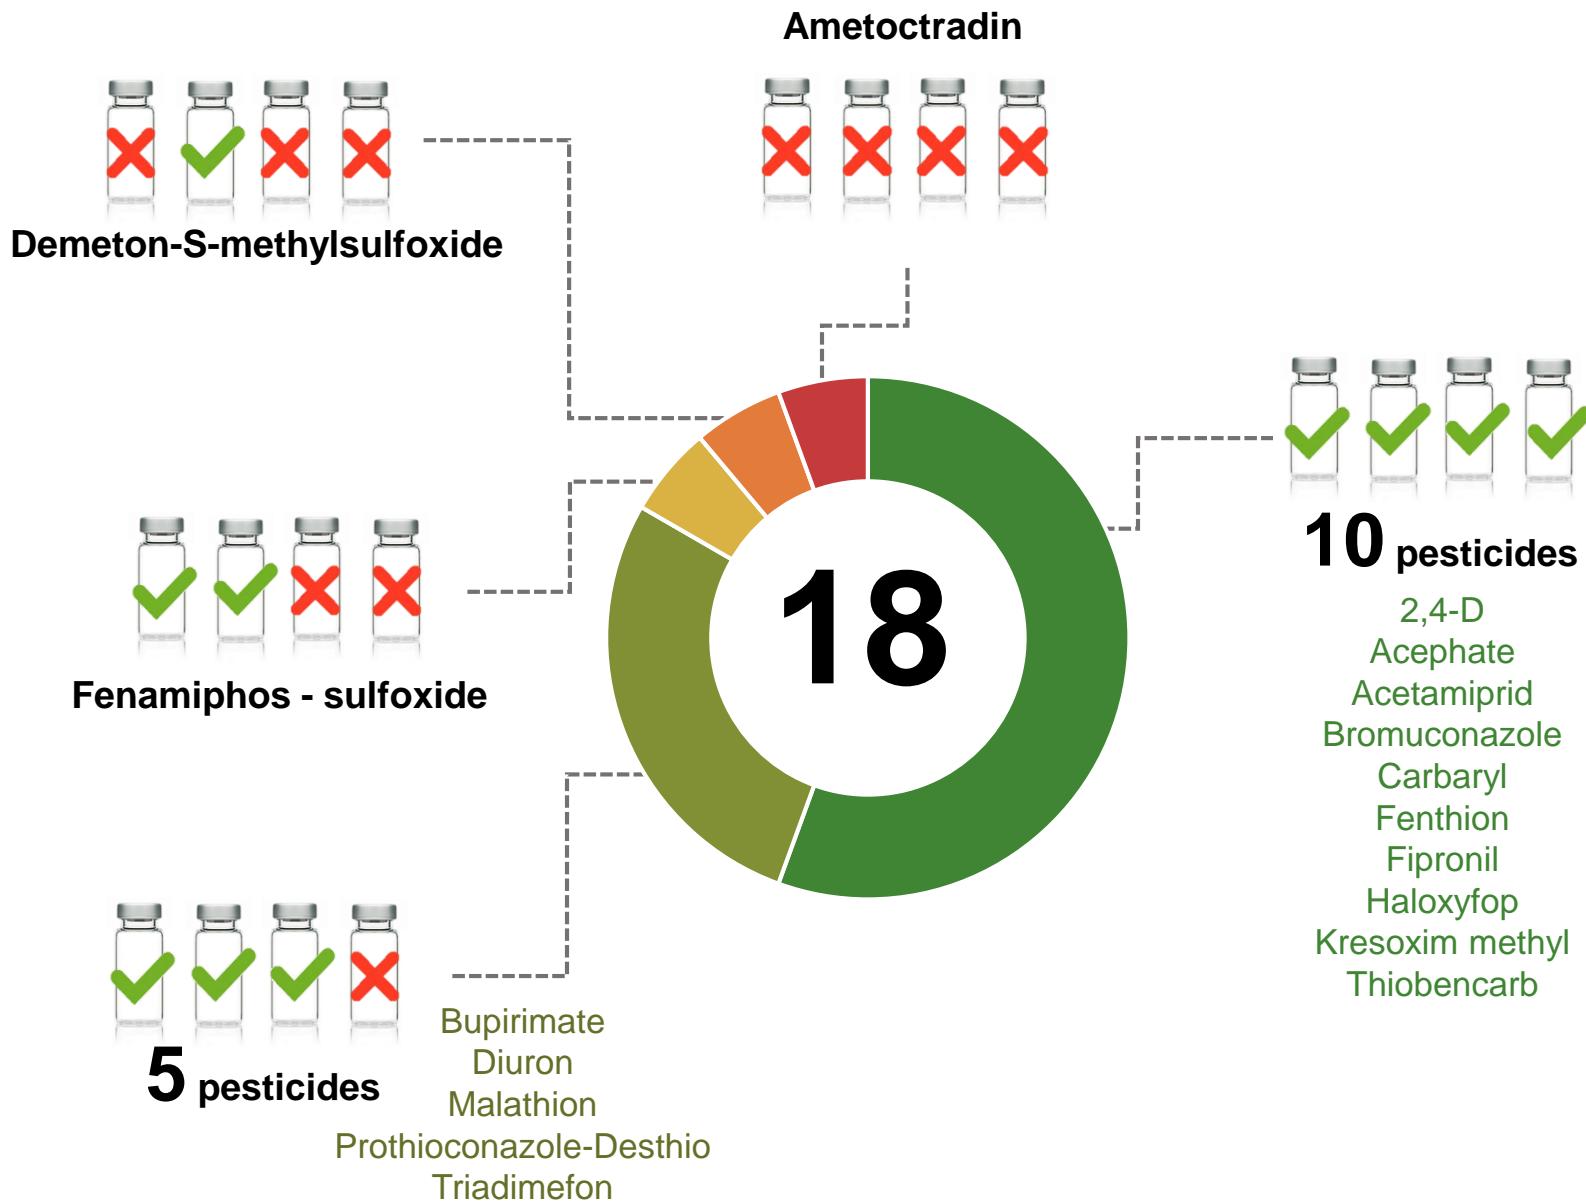

# CONCENTRATION ASSESSMENT

- 18 pesticides for which at least 5 participants reported similar concentration ( $CV \leq 10\%$ )
- Each bar represents the average of 5-7 results (one per laboratory)

**Acceptable concentration** of a certain pesticide in a solution:  $50 \pm 5 \mu\text{g/L}$  (10% deviation)

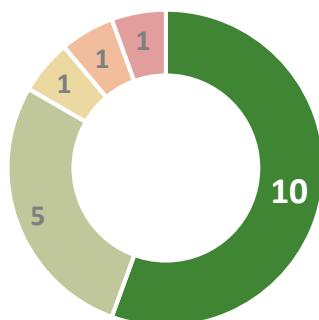

# CONCENTRATION ASSESSMENT

# CONCENTRATION ASSESSMENT

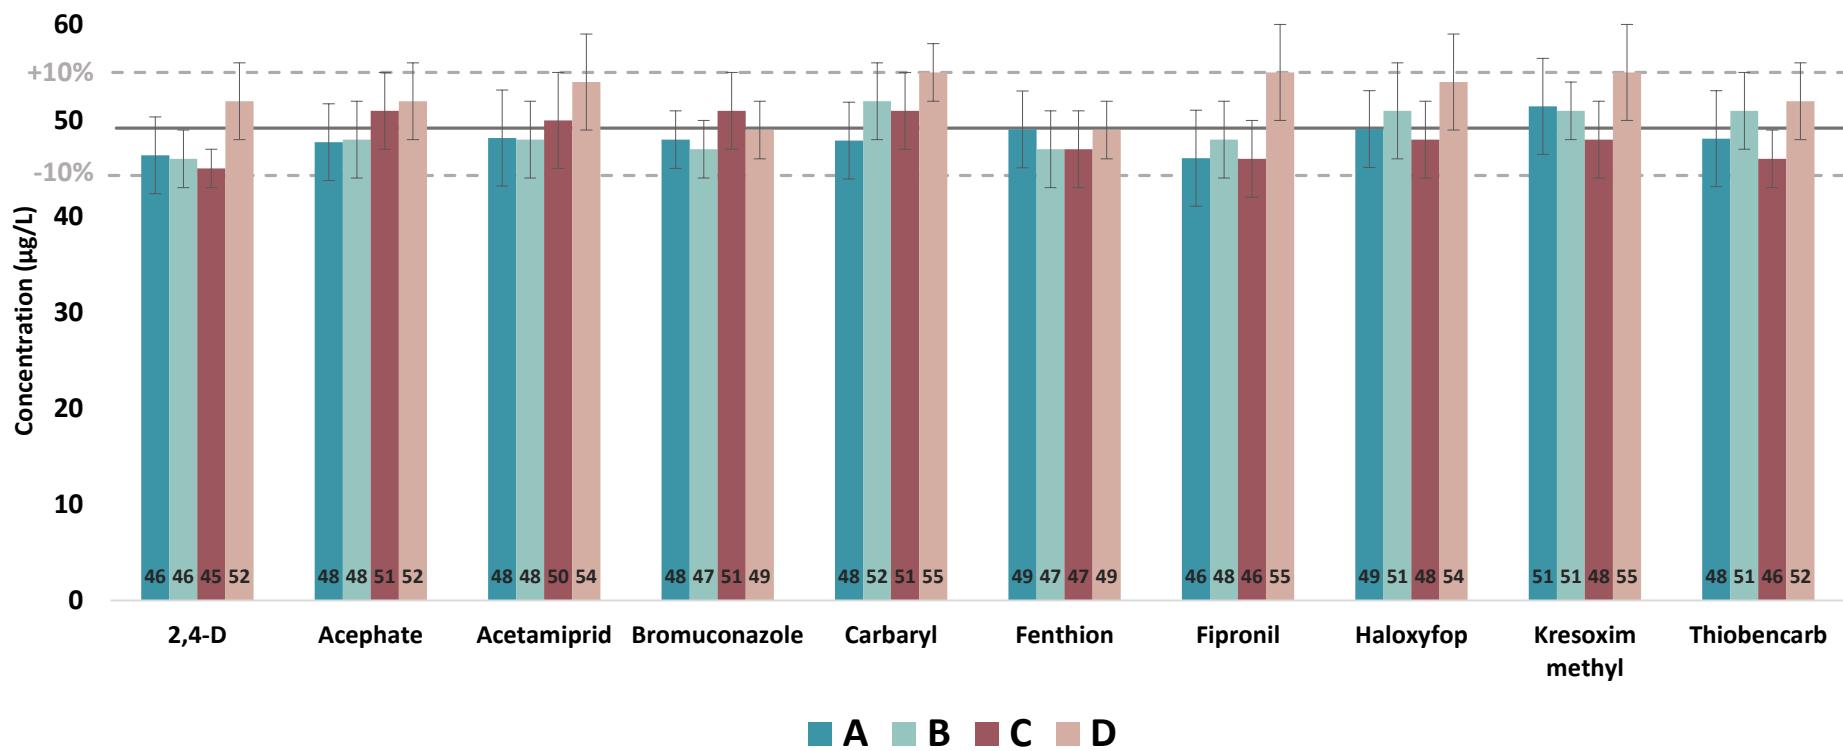

Number of pesticides

All solutions meet the acceptance criteria

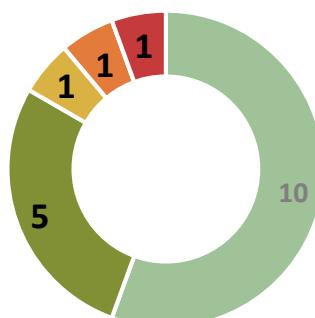

- ✓ Inter-laboratory CV  $\leq 10\%$  ( $n \geq 5$ )
- ✓ Concentrations =  $50 \pm 5 \mu\text{g/L}$  (10% dev)

# CONCENTRATION ASSESSMENT

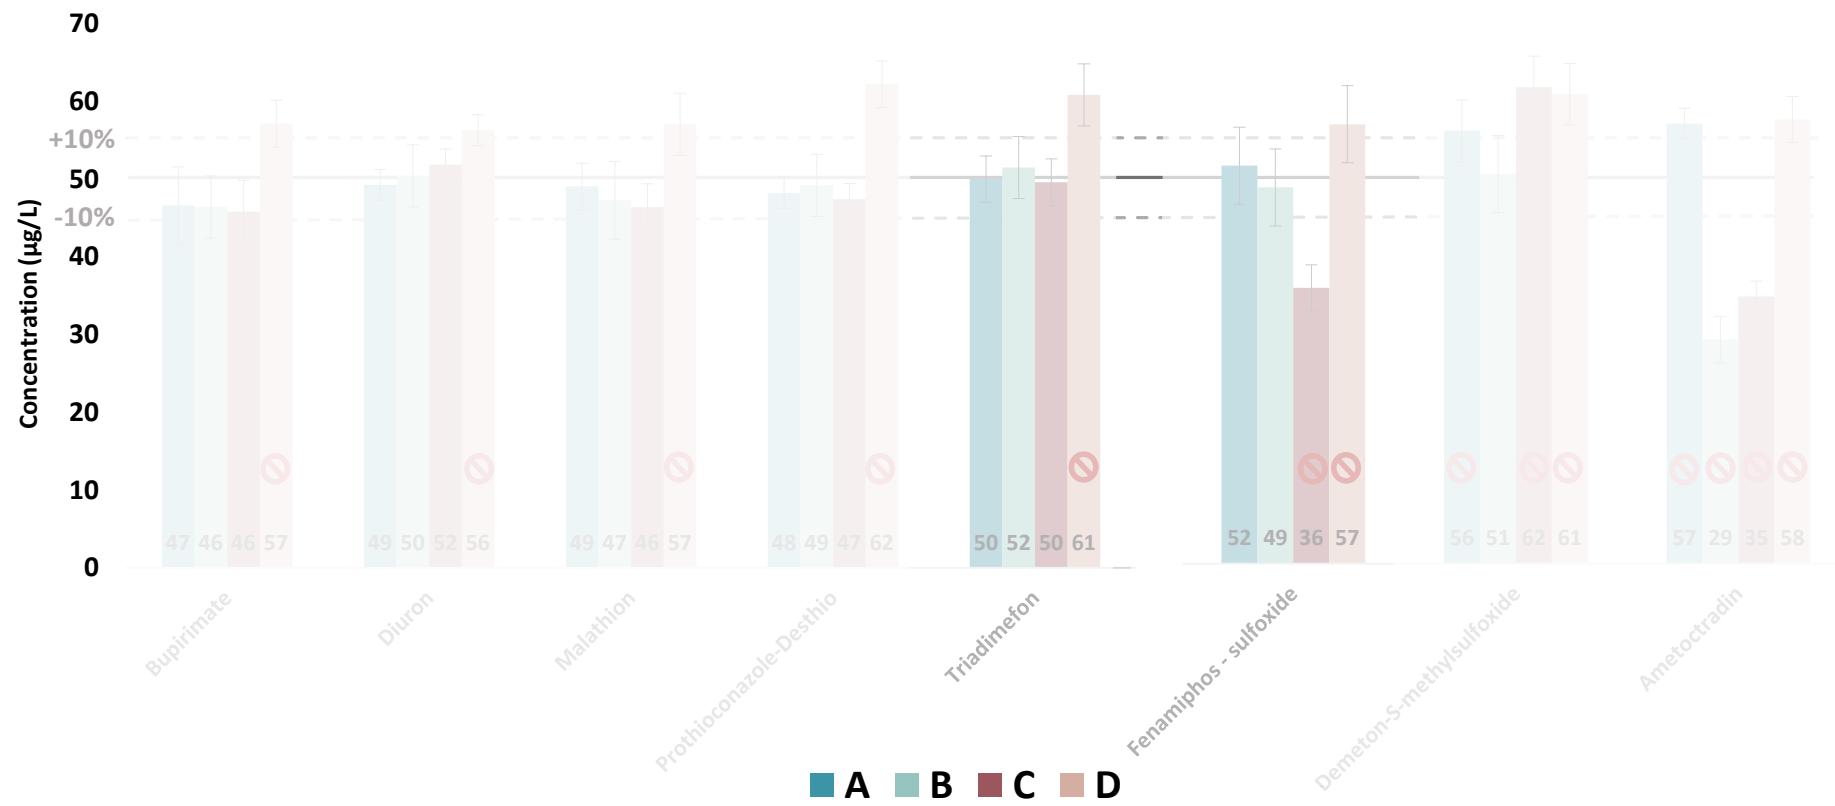

Number of pesticides

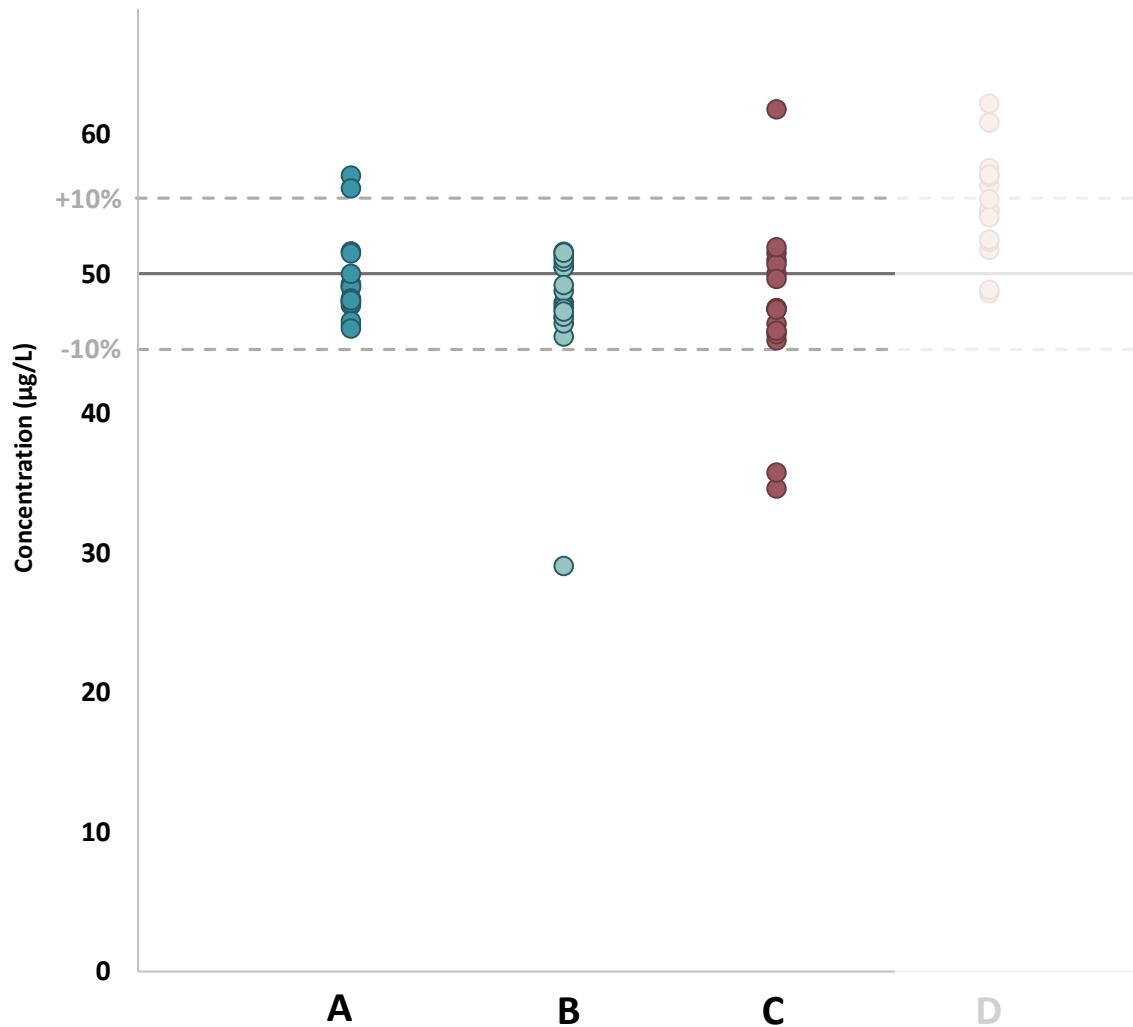

🚫 Results that do not meet the acceptance criteria

✓ Inter-laboratory CV  $\leq 10\%$  ( $n \geq 5$ )

✗ Concentrations =  $50 \pm 5 \mu\text{g/L}$  (10% dev)

## Omethoate

## Procymidone

## Certified standard solutions

At least 80% of pesticides showed a deviation  $\leq 10\%$  from the certified concentration.

In some cases, the companies do not have enough knowledge of the behaviour of some pesticides in solution.

One of the solutions was clearly unsatisfactory, with several concentrations higher than 55 ppm (more than 10% deviation).

## Laboratories

The deviation of the standard solutions prepared by the laboratories contained a considerable error in at least 5% of the results.
